

Freelance Felines Questionnaire

Thank you for your interest in adopting an outdoor working cat(s) from Montgomery County Animal Services and Adoption Center.

Through our Freelance Felines Program, cats are matched with appropriate barn or warehouse homes FREE OF CHARGE, and come to the adopter already spayed or neutered, vaccinated, and microchipped. Available cats range from semi-feral to tame, but they have all been selected for our Freelance Feline Program because they are not ideally suited to an indoor-only home. This program saves cats' lives while providing an effective rodent deterrent for the adopter.

The Freelance Feline Adoption process is quite simple. If you can please answer the following questions for us, it will help us match you to cat(s) that are the best fit for your situation:

Name: _____ Phone: _____

Address: _____

Email: _____

1. What kind of structure do you intend to use for shelter for the cat(s)?
(Barn, Garage, Warehouse, etc.) and size of property?

2. If the structure is not a barn and has no heat source, do you have an insulated doghouse or something similar for very cold weather?

3. How many cats are you looking for? (At least a pair is best) _____
4. Do you have dogs that run loose on the property? If so, have the dogs been around cats before? _____
5. Will you accept totally independent cats that you may rarely see (unsocialized) or only cats that are semi-social (will hang out in visible places, will likely greet them when they come into the barn, etc.)?

6. Are you willing to do the "Acclimation Procedures" and then continue to provide food and water for the life of the cat(s)? (Cats cannot live on hunting alone, and supplementing with cat food will not reduce their drive to hunt.) _____
7. Do you wish to have someone set up the acclimation crate for you or are you comfortable doing it yourself? _____
8. What is traffic like near your property? _____
9. Do you have resident outdoor cat/s on your property, if so is it spayed or neutered? _____
10. How soon were you looking to adopt? _____
